FOUNDER & CEO

The logo features the word "privada" in a light blue, lowercase, sans-serif font, positioned above a thin horizontal line. To the right of the line is a small, stylized brown circular icon with two smaller circles inside. Below the line, the word "MIXOLOGY" is written in a large, bold, light blue, uppercase, sans-serif font.

privada MIXOLOGY

Privada is the industry's first completely customizable tanning and skin care regimen. Built on the belief that not all clients have the same tanning and skin care needs, Privada empowers your clients to create and blend a formula that is all their own! Enjoy being able to tailor your lotion for your specific needs without having to commit to an entire bottle of a single formulation. Privada formulas are created by a team of in-house chemists, designers, and award-winning product developers. Products are manufactured in one of the largest and most recognized tanning lotion facilities in the United States. In addition to using premium ingredients, all formulas are created sulfate and paraben free, as well as being non-comedogenic. With "My Custom Privada", clients have the power of choice with thousands of different possible formulations.

With Privada, we understand your skin is unique. So, your custom formula should be to!

PRIVADA BASES

Our Privada Bases were developed so that everyone can enjoy them! They are aloe based, gluten free, nut free, hypoallergenic, non comedogenic, and fragrance free. Each formula provides maximum hydration and ease of mixing.

AROMA COLLECTION

Fragrance plays a large role when purchasing any skincare product. Simply put, if we don't like the fragrance, we don't like the product. With Privada's Aroma Collection, clients can not only choose a fragrance that best fits them, but they can directly control how light or strong the fragrance becomes. With our convenient spill proof droppers, clients can add a little or a lot to create their perfect aroma. Mixing and matching various aromas and strengths gives your client full control to create a truly unique scent.

COLOR COLLECTION

Each new day can bring a different set of skincare goals for your client. Your products should be able to be flexible enough to meet these goals on a day to day basis. With Privada's Color Collection, clients can fine tune the color they wish to achieve using these additives as color enhancers and correctors. Your client can make their My Custom Privada as dark or as light as they want. They could even go colorless if they choose. Further possibilities using the Color Collection include pairing the Instant Bronze additive with any Privada Base to make a quick instant wash-off bronzer. Or, use the Violet additive to get the perfect hue to your tan. The Color Collection was designed for those seeking deeper, darker, and longer lasting results who want full control over their color. The shades of glow are limitless when using the Privada Color Collection.

BRONZE - Our Bronze Color additive is of DHA, the component used in self tanner products. This additive develops color in 4 – 8 hours and can last anywhere between 2 – 7 days, depending on the client's skin maintenance routine. Our Bronze additive is ideal for the tanner who wants to maintain their color in-between sessions or get a jump start to their tan and want to see results fast.

INSTANT BRONZE - Our Instant Bronze Color additive is designed for those who want color, now! This additive can be used alone to give your skin instant color, which will wash off at the end of the day. Alternatively, it can be used in conjunction with one of our other color additives to give the skin instant and noticeable bronzing results.

VIOLET - Our Violet Color additive is formulated for the tanners who tend to tan more on the red side, or the orange side and desire a more natural bronzed result. The Violet Color additive uses violet color agents as well as Blue Tansy extracts to counteract any reddening or orange tones in the skin, producing sunkissed results.

BOOST COLLECTION

No premium lotion is complete without fulfilling the needs of the client's skin. Each of Privada's boosters in the Booster Collection uses trademarked and thoroughly tested, high quality skincare additives that can be found in the most globally renowned beauty brands. Developed to be potent and go beyond the average tanning product, the Boost Collection uses targeted formulas to protect, strengthen, correct, and improve the overall health, as well as appearance, of your client's skin.

QUENCH - Formulated to add extra hydration and luster to dry, under nourished skin. Blends of Coconut Oils, Cocoa Butters, Shea Butters and Dead Sea minerals hydrate the skin to help keep it supple and healthy, prolonging results. Added silicone alternative C5 Technology works to lock in skin moisture for a deeper, more hydrated feel.

VITAMINS - The Vitamin blend is an essential part of your skincare routine. Free radical damage occurs when the skin comes in contact with environmental stressors, such as pollution. This stress dulls the skin, making this Booster vital to providing your skin with the nutrients it needs. Our Vitamin Blend uses super fruit antioxidants from Acai Berry, Pomegranate and Dragon fruit to fight off free radical damage. Added Vitamins C & E (both antioxidant vitamins) helps reduce the appearance of scars and stretch marks. This Booster may also aid in the reduction and repair of damaged skin cells.

CORRECT - The Correct Booster contains 3 ultra-potent agents. The Advanced Matrixyl Synthe 6™ is a powerful peptide that boosts skin rebuilding properties. This antiwrinkle complex helps reverse the signs of ageing while helping to smooth wrinkles. Niacinimide™ is high in Vitamin B3 and works to visibly improve large pores, uneven skin tones, fine lines, wrinkles and dullness. Finally, Kollaren™ focuses on the rebuilding of collagen and elastin in the skin while also increasing overall firmness.

INTENSIFY - The Intensify blend is your tanning super charger! This formula blends MelaTime™ and MelanoBronze™ to stimulate melanin production for faster, darker tanning results. While added Nouritan™ and an extra dose of Tyrosine will help stimulate tyrosine activity in the skin to promote faster and more even tanning results.

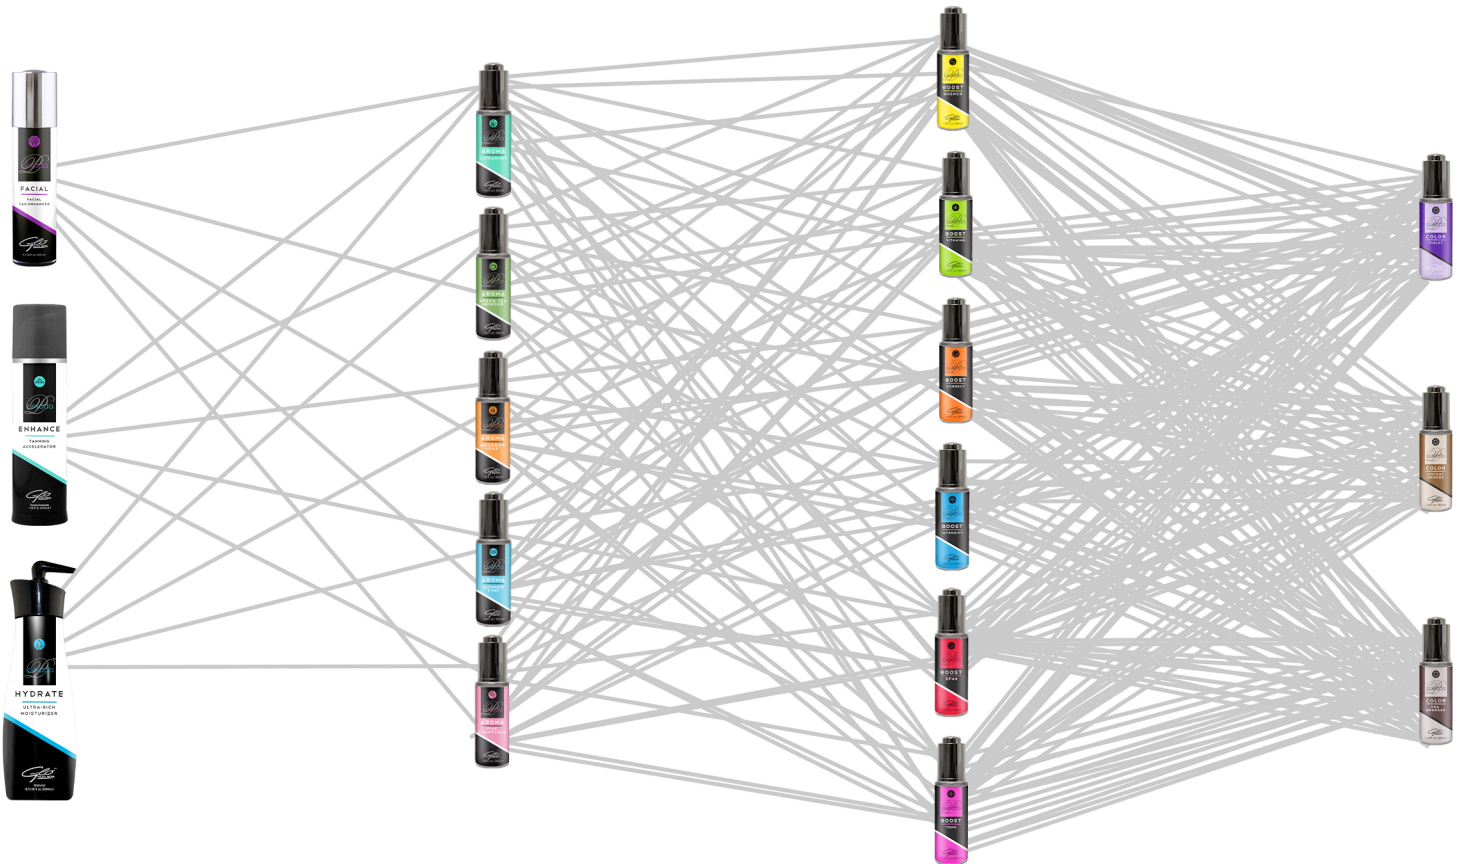

SPA+ - Turn your Privada Base into a Sunless Prep lotion or a Light Therapy Prep lotion. Spa contains high levels of pH Balancers to help neutralize pH levels for optimal light and sunless absorption, resulting in an ultra-even result after every session.

TONE - The Privada Tone booster is your solution for all things tightening and toning. Our tone booster contains a blend of BodyFit™ to reduce the appearance of cellulite and restores firmness. Renovage™ (nicknamed 'The Fountain of Youth') reduces the appearance and loss of collagen and elastin in the skin by increasing the life span of the collagen and elastin producing cells. It's also known to reduce hyperpigmentation, age spots and skin sagging. Reservitol™ works on a cellular level to fight the signs of ageing and is known to reduce inflammation and redness in the skin. Finally, added Black Charcoal helps detoxify and draw toxins from the skin to leave you with a flawless, glowing complexion.

THOUSANDS OF COMBINATIONS
